How do I set/change my HPC Account Password?

** Effective from 15th April 2012 **

1. Go to https://access.qut.edu.au/trspw/:
   - NOTE: In order to display this page, you may be requested to first authenticate yourself using your QUT-Access username and password.
2. Once displayed, the above web link will prompt you to enter a new password and ask you to confirm it.
3. Do the above action and then click "Proceed to change password”.
4. A new page will be displayed, listing Success for HADAR (the HPC platform).

**NOTES:**

- Your new password can take up to 10 minutes to be updated and recognised.
- The above procedure changes your HPC password, along with all other host and server passwords that are registered under your QUT-Access username.
- In the near future, a separate password for logging in to the HPC system will not be required. You will instead be able to use your QUT-Access username and password for this purpose. We will advise you when this system is in place.
